

CONSUMABLE EQUIPMENT FOR CCHD SCREENING REPLACEMENT PROGRAM – HOSPITALS

Thank you for your ongoing frontline commitment to promoting healthy starts for Ontario babies. As in previous years, NSO (Newborn Screen Ontario) will be able to provide some support for the replacement of consumables used for CCHD (Critical Congenital Heart Disease) screening, specifically for sensors and wraps. However, we have limited funding, so replacement supplies will be allocated using a volume-based approach, as we did for the original distribution of pulse oximeters.

For every pulse oximeter that NSO allocated to your hospital, we can provide one replacement sensor (reusable), along with a supply of wraps, at no charge. Every year, the program will **begin in April** and hospitals will be able to take advantage of this support **once per fiscal year** (April-March). We ask that you place one order for the entire year.

Select either *Option one (Masimo Monitors)* or *Option two (Covidien/Nellcor Monitors)*

OPTION ONE – MASIMO MONITORS
