

Newborn Screening Bulletin 2023-4

May 5, 2023

Good afternoon,

As you may have heard from our last communication, NSO is hosting a series of educational sessions beginning this spring. Our first session will be on **accessing newborn screening results available in the Ontario Laboratories Information System (OLIS) via a clinical viewer**. Experts from Ontario Health will be joining us to discuss how to set up and navigate the clinical viewer and OLIS, as well as answer any questions you may have.

The information session will be held on Tuesday, May 16th from 11-12pm on Zoom (see meeting information below). If you would like to add this event to your calendar and/or share with colleagues, feel free to use the calendar event that is attached to this email.

In this session, we will discuss:

- What OLIS is and why we are promoting it
- How to gain access to clinical viewers and OLIS
- Review of data available via the clinical viewer
- Demo of results search

This session will be recorded and posted on our website. We will keep time at the end for any questions you may have.
